

Learn how to build your very own Flyaway Flier (a.k.a. paper airplane) by following the directions below.

Please DO NOT throw your paper airplane at people or animals as it may cause injury.

## INSTRUCTIONS

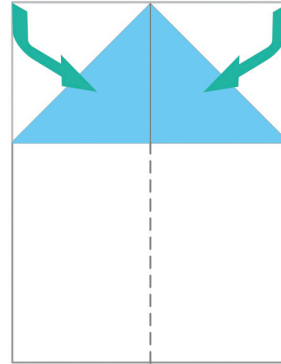

Before starting, print the Flyaway Flier template on an 8.5" x 11" piece of paper.

1

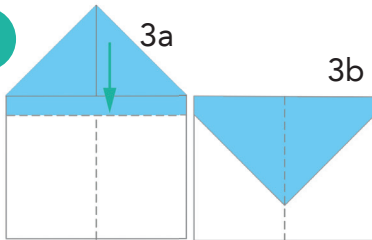

With the white side of the paper facing up towards you, fold the paper in half lengthwise. Then unfold it so the paper is lying flat again.

2

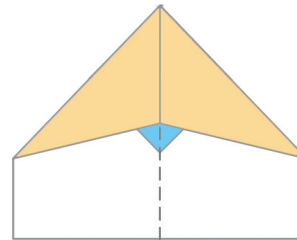

Take the top two corners and fold them toward you to create a blue triangle with a white outline.

3

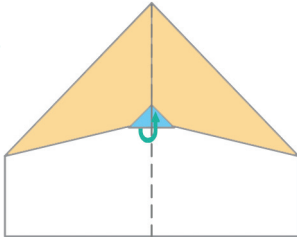

Pull the blue and white triangle you created towards you and fold it on the horizontal dotted line. When you are finished it will look like 3b.

4

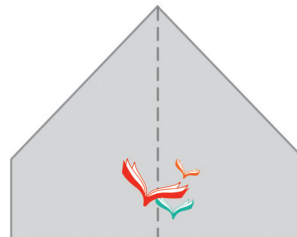

Fold the top two corners towards you like you did in Step 2. Then locate the small blue and white triangle sticking out from behind your yellow triangle filled with flying Flyaway characters.

5

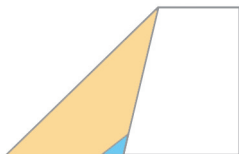

Fold the blue and white triangle up so it holds the yellow triangle in place.

6

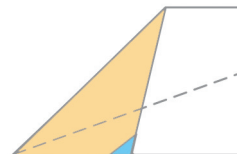

Flip the flier over (so the design is facing you) and fold it in half toward you, following the dotted line.

7

Flip the flier so the longest horizontal line is at the bottom.

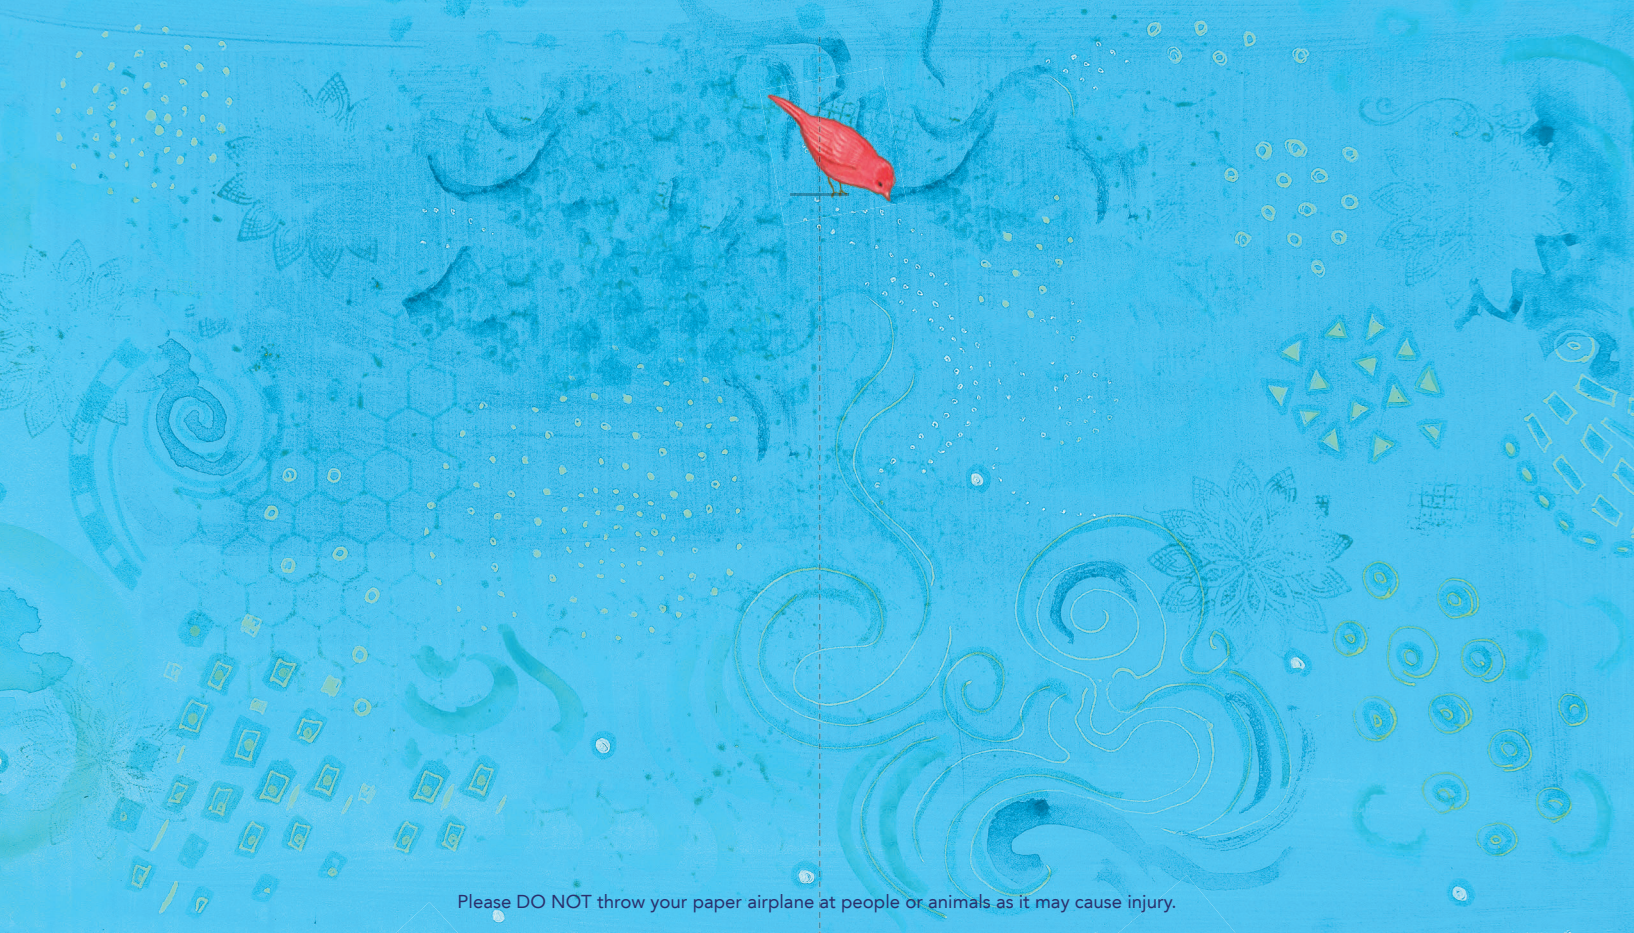

8

Fold down the wings on both sides (following the dotted lines.)

Your flier is ready to soar!  
Happy flying, Flyaway Family!

Please DO NOT throw your paper airplane at people or animals as it may cause injury.
